Department of Computer Science & Engineering (IoT)

Vision of the Department

To be a well-known centre for pursuing computer education through innovative pedagogy, value-based education and industry collaboration.

Mission of the Department

To establish learning ambience for ushering in computer engineering professionals in core and multidisciplinary area by developing Problem-solving skillsthrough emerging technologies.

Session 2026-2027

Vision: Dream of where you want.	Mission: Means to achieve Vision
---	---

Program Educational Objectives of the program (PEO): (broad statements that describe the professional and career accomplishments)

PEO1	Preparation	P: Preparation	Pep-CL abbreviation pronounce as Pep-si-IL easy to recall
PEO2	Core Competence	E: Environment (Learning Environment)	
PEO3	Breadth	P: Professionalism	
PEO4	Professionalism	C: Core Competence	
PEO5	Learning Environment	L: Breadth (Learning in diverse areas)	

Program Outcomes (PO): (statements that describe what a student should be able to do and know by the end of a program)

Keywords of POs:

Engineering knowledge, Problem analysis, Design/development of solutions, Conduct Investigations of Complex Problems, Engineering Tool Usage, The Engineer and The World, Ethics, Individual and Collaborative Team work, Communication, Project Management and Finance, Life-Long Learning

PSO Keywords: Cutting edge technologies, Research

“I am an engineer, and I know how to apply engineering knowledge to investigate, analyse and design solutions to complex problems using tools for entire world following all ethics in a collaborative way with proper management skills throughout my life.” to contribute to the development of cutting-edge technologies and Research.

Integrity: I will adhere to the Laboratory Code of Conduct and ethics in its entirety.

Sheikh Wasimuddin

Session	2026-27 (ODD)	Course Name	Lab: Hybrid Computing Systems
Semester	7	Course Code	23IOT1704
Roll No	61	Name of Student	Sheikh Wasimuddin

Practical Number	04
Course Outcome	1. Understand Cloud Computing architecture, service models, deployment models, and virtualization. 2. Apply cloud platforms, storage services, and containerization for application deployment. 3. Implement Edge and Fog Computing solutions for IoT applications. 4. Analyze and develop integrated Cloud-Fog-Edge computing applications based on performance evaluation.
Aim	To study and perform cloud storage management operations such as uploading files, sharing files, managing file versions, and controlling access permissions.
Theory (100 words)	Cloud storage is a service that allows users to save and manage digital data on remote servers through the Internet. It reduces the need to depend only on the storage available on a personal computer, laptop, or mobile device. Services such as Google Drive, OneDrive, and Dropbox provide online storage where different types of files can be stored and accessed from multiple devices. Cloud storage management involves organizing and controlling stored data efficiently. Users can upload files such as documents, photographs, videos, and application data to the cloud. Files can be arranged into folders, renamed, moved, downloaded, or deleted whenever required. Cloud platforms also provide sharing facilities, allowing users to give other people access to selected files or folders with specific permissions. Another important feature is file version control, which allows previous versions of files to be retained and restored when necessary. Access

Department of Computer Science & Engineering (IoT)

Vision of the Department

To be a well-known centre for pursuing computer education through innovative pedagogy, value-based education and industry collaboration.

To establish learning ambience for ushering in computer engineering professionals in core and multidisciplinary area by developing Problem-solving skillsthrough emerging technologies.

	permissions can be configured to control whether a person can only view, comment on, or edit a file. Authentication and security mechanisms help protect stored information from unauthorized access. Therefore, cloud storage management provides a convenient way to store, organize, access, share, update, and protect data. Since the files are stored online, users can access their information from different locations and devices whenever an Internet connection is available.
Procedure and Execution (100 Words)	1. Open a cloud storage platform such as Google Drive and log in to your account. 2. Create a new folder to organize and store the required files. 3. Select New → File Upload and choose the required file from the computer. 4. Wait for the upload process to finish and confirm that the file appears in the cloud folder. 5. Right-click on the uploaded file and select the Share option. 6. Enter the email address of the person with whom the file needs to be shared. 7. Select the appropriate access permission, such as Viewer, Commenter, or Editor. 8. Click Send to provide access to the selected user. 9. Open the uploaded file, make some changes, and save the updated file. 10. Open the file's Version History or version-management option to check the available previous versions. 11. Select an earlier version to view or restore it when required. 12. Open the Sharing settings again and modify or remove the access given to a user. 13. Verify that each user can access or modify the file only according to the assigned permissions. 14. Confirm that the operations of uploading, sharing, version management, and access control have been successfully completed.

	 The screenshot displays a cloud storage application interface. At the top, there is a navigation bar with icons for help, settings, share, and a menu. The main content area shows a file named '61_03_HCS_Sheikh Wasimuddin.pdf' with a 'Details' and 'Activity' tab. The 'Activity' tab is selected, showing a timeline of actions: 'You shared an item' at 6:22 PM Sep 20, followed by a file icon and the name '61_03_HCS_Sheikh ...', and a note 'Anyone on the internet with the link Viewer'. Below this, it shows 'You uploaded an item' at 6:20 PM Sep 20, followed by a folder icon and the name 'HCS Practical', and a file icon and the name '61_03_HCS_She...'. A right sidebar contains a calendar icon for '31', a lightbulb icon, a checkmark icon, a user icon, and a plus sign for more options.
Conclusion	Thus, the basic functions of cloud storage management were successfully completed. The practical demonstrated how files can be uploaded, shared, organized, updated, and managed using access permissions . It also provided an understanding of version control and secure file access . Hence, cloud storage offers a convenient and efficient method for storing and managing data from different devices through the Internet.
